

YEMEN FUTURE FOR OIL, GAS, CONSTRUCTION, INGOs AND LNGOs SERVICES

Yemfogs.com

With This Filed of services.....

We will continue to introduce advanced technology, excellent quality of Yemenis enterprises and world to provide quality and efficient services. As general manager of Yemen Future for Oil, Gas, Construction and Logistics Services. I charged with the mission entrusted to contribute our strength for Yemeni Oil industrial technology level and Worldwide socials organization. And also, we will continue to pursuer & create, to provide quality of services to global system, with higher technology and services quality, win customers products & services recognized as the world's top.

At the same time, we will keep “continue to self-innovation and make process” as our action rules. And do our greatest efforts and most sophisticated technology to provide customers with quality, price, performance, delivery of products and services. Thus, we hope develop together with clients to achieve the ambitious goal of the future.

Here, we would like you to give more us more encouragement, guidance and assistant in the future.

General Manager

April.22.2016

**Our
Vision**

Vision & Mission

Since inception, Yemen Future for Oil, Gas, Constructions & Socials Organization Services has been guided by a firm philosophy that a company's main asset is the measure of trust that can be built with both supplies and clients. Through this trust, reliability and confidence, Yemen Future for Oil, Gas, Constructions & Socials Organization Services role in the development of Yemen has enhanced its commitment to corporate excellence in all aspects of operations. Sound operational policies, a management team philosophy and the fostering of relationships with clients, supplies business partner and staff, collectively support Yemen Future for Oil, Gas, Constructions & Socials Organization Service's ability to meet client's requirements. Yemen Future for Oil, Gas, Constructions & Socials Organization Service's main objective is to continue contributing to the modernization of Yemen, with a focus on the need of the coming century.

Organization

Yemen Future for Oil, Gas, Constructions & Socials Organization Services is managed by professionally qualified and pro-actively motivated personnel of different nationalities to achieve set objectives in a professional manner. Further advancement and growth in management system is continuously imparted through specialized training programs sponsored by the company from time to time both in-house & through external agencies. The company provides excellent working environment to achieve high productivity with safety and quality. Effective bilateral communication in the organization provides the people with an understanding to achieve overall project schedule with highest quality as a common goal.

History

Yemen Future for oil, Gas, Construction & Socials foundation service was established in 2016 with the prime objective of marketing activities catering to the development of industrial and domestic infrastructure of Yemen. Subsequently, the company diversified its activities in line with the country's growth requirements and achieved tremendous success in its specialty of civil, mechanical and electrical engineering and contracting, particularly in the oil and gas sectors. The diversity of Yemen Future for oil, Gas, Construction & Socials foundation service has contributed to a solid reputation in fields of:

- Oil & gas, Petrochemical services.
- Energy & Power.
- Infrastructure, Engineering & Construction.
- Telecommunications.
- Safety & Environment.
- Car renter services.
- Catering services.
- Madisen supplies.
- Logistic supplies.

ENGINEERING SERVICES

- Civil Engineering.
- Structural Engineering .
- Mechanical Engineering.
- Electrical Engineering.
- Instrumentation Engineering.
- Low Current Engineering .

MAINTENANCE SERVICES

- Shutdown Maintenance.
- Industrial Maintenance.
- Valve Maintenance.
- Traffic & Highway Maintenance.

FABRICATION SERVICES

- Structural.
- Piping.
- Pressure Vessels / Tanks.
- GRE Piping.
- Maintenance services .

SPECIAL SERVICES

1. Supply of equipment for the oil and gas industry operators for oil concession in Yemen.
2. Public construction and road.
3. Power plants and maintenance.
4. Construction and maintenance of oil field plants.
5. Provide heavy and light equipment and specialized tools and spare parts.
6. Rental of portable accommodation & office units.
7. Calibration equipment.
8. Provide specialized personnel in the field of cathodic protection.
9. Provide manpower for maintenance work in the oil field.
10. Car rental services.
11. Chemical Cleaning.
12. Hydro-jet Cleaning.
13. Heat Exchanger Re-Tubing.
14. Cold Cutting.
15. Bolt Tightening / Tensioning
16. Scaffolding.
17. Insulation.
18. Blasting / Painting.
19. Transportation service.
20. Good transportations service.
21. Logistics service.

Instrument Calibration Services

We provide commercial instrument calibration and test equipment repairs services for a wide variety of measurement and test equipment. Our laboratory currently provides quality instrument calibration and test equipment services to manufacturing, petrochemical, service, testing, engineering companies. On site instrument calibration services are available for most technical measurement parameters, the laboratory supports. We have staffed with highly trained experts and the calibration capabilities to meet the needs of virtually every industry.

Blasting & Painting Services

Yemen Future for oil, Gas, Construction & Socials foundation services has the capability

to provide painting and blasting services both onshore and offshore. Consumables utilized are to customer specification. We provide Epoxy brush painting services which are widely preferred in petrochemical refinery and fertilizer industries. The system is helpful for different coatings such as maintenance, structural and floor. Due to the speedy curing at room temperature and excellent toughness & abrasion resistance, resistance to heat, oil, alcohols acid & salty weather, the system provides painting in aircraft finishes, transport finishes and chemical industries. We also provide Airless Spray-painting services to various industries. In spray painting, airless paint sprayers are used which is specially designed to paint large surface within short span.

Construction Equipment Operations

Major construction equipment required for various project sites are owned and maintained by Yemen Future for oil, Gas, Construction & Socials foundation service

Plant and Equipment Services

department carefully examines the logistics regarding the requirement of equipment for every project and organizes the same judiciously. Specialized equipment required for heavy lifts are hired locally. Well maintained equipment, manned with highly skilled operators are provided to meet the safety requirements.

Machines are demonstrated to perform in an optimum condition while on the job training to its operators are imparted by the equipment manufacturer from whom the equipment is Purchased. The record for all preventive and breakdown maintenance is maintained for effective operation. Automated tracking keeps equipment in good condition for rapid mobilization. Equipment certification

The highlights of major workshop equipment are as follows:

- ❖ COLUMN AND BOOM SAW WELDING MACHINES WITH JOINT TRACKING SYSTEM.
- ❖ ROLLING MACHINES UP TO A CAPACITY OF 6.2 M DIA X 40 MM THICKNESS.
- ❖ SUFFICIENT OVERHEAD CRANAGE (30 T).
- ❖ CNC PROFILE CUTTING MACHINERY FOR CARBON STEEL CUTTING UP TO 180 MM.
- ❖ PLASMA CUTTING MACHINES FOR SS CUTTING
- ❖ WELDING ROTATORS AND POSITIONERS UP TO 30 TONS CAPACITY.

Mechanical: Piping & Structures

- ❖ ENGINEERING DESIGN SERVICES
- ❖ PRE-FABRICATION OF PIPING & STRUCTURES
- ❖ INSTALLATION OF PIPING AND STRUCTURES
- ❖ NON-DESTRUCTIVE TESTING AND X-RAY SERVICES
- ❖ EQUIPMENT ASSEMBLY AND INSTALLATION
- ❖ MECHANICAL PRE-COMMISSIONING AND COMMISSIONING SERVICES

Mechanical: Special Services

- ❖ RO SKID FABRICATION, ASSEMBLY AND INSTALLATION
- ❖ CHLORINE SKID FABRICATION, ASSEMBLY AND INSTALLATION
- ❖ INSTALLATION OF PIPING AND FITTINGS
- ❖ INSTALLATION OF PUMPS AND CONTROL PANELS
- ❖ PRESSURE TESTING SERVICES
- ❖ PRE-COMMISSIONING AND COMMISSIONING SERVICES

Electrical and Instrumentation

- ❖ ENGINEERING DESIGN SERVICES
- ❖ CABLE LAYING & TESTING
- ❖ INDUSTRIAL INSTALLATIONS (LV & HV)
- ❖ UNDERGROUND CABLING WORK
- ❖ SOLAR POWER PANELS INSTALLATION
- ❖ INSTALLATION OF EQUIPMENT'S
- ❖ INSTALLATION OF INSTRUMENTS
- ❖ TERMINATIONS
- ❖ CALIBRATION
- ❖ TESTING AND PRE-COMMISSIONING

Project Management

Our exposure on project management area is as follows: -

- ❖ Developing project schedules and preparation of all planning documents,
- ❖ Identifying cost elements and trends that influence the protect progress and contractual commitments.
- ❖ Investigate divergence and prepare detailed explanations for significant variations.
- ❖ Review of monthly MIS, Liaising with Engineering, Production and Finance departments to determine protect scope, production expectations and resource requirements.
- ❖ Monitoring of contract information and prepare monthly contract information Report.

Recruitment Assistance

We also provide recruitment assistance services, for interview and advise the recruitment of supervisory, working level and Engineering personnel from India and other countries based on the plan generated.

We get the approval of welders based on the requirements of WPS/ POR developed specifically for the project

Cold Cutting

We offer a cost effective and safer alternative to hot_ cutting methods by using high pressure water jets mixed with abrasive, capable of cutting material of virtually any grade or thickness, by using abrasive waterjet cutting, it means that there's no need for degassing, and the surface is left already prepared for

re-welding - saving you precious time and money. Yemen Future for oil, Gas, Construction & Socials foundation service has gained a wealth of experience on decommissioning, shutdowns, demolition, and salvage projects over the past twenty-five years. This along with our excellent safety record, state-of-the-art equipment, and dedication to customer care, makes us leaders in our field.

Scaffolding Services

Our scaffolding Services provides high quality scaffolding and access solutions for offshore, onshore and industrial projects. We have the experience, expertise and resources to plan, implement and oversee a wide range of scaffolding work, from private residential through to high profile commercial projects. We will ensure that work is carried out to exceptionally high standards, on schedule and within budget. Our Scaffolding team has demonstrated its flexibility by meeting the needs and ever-changing schedules of their customers. Refurbishment and maintenance contracts continue to be at the forefront.

Heat Exchanger Re-Tubing

Our expertise extends to Re-tubing of Heat Exchangers 8. Condenser Tubes,

Tube & Tube Sheet Expansion, Tube & Tube Sheet Joint Welding (TIG). We work with many well-known petrochemical plants across Yemen.

Yemen Future for oil, Gas, Construction & Socials foundation service specializes in high production re-tubing tooling packages, technical assistance, planning, specifications, procedures, support

and turnkey services to the level and circumstances necessary for the particular

project. Our support is keyed to making the most effective use of the time and

other resources available, and is focused on mitigating schedule,

performance and quality risks, we have built up a very talented / skilled team who

have taken up time bound & critical jobs. We are geared up with all latest tools

tackles like tube pulling system, automatic torque expansion system, tube

wall reducer, tube installation tools, tig welding set, etc.

Traffic & Highway Maintenance

In the field of Traffic & Highway Maintenance, most of the road marking and street

furniture installed in Yemen reflect the capability and expertise of Yemen Future for oil, Gas, Construction & Socials foundation service

in roads, airports and car park markings.

Activities involved are:

- Supply and application of thermo-plastic and cold paint road markings
- Traffic signals/Controllers/Remote monitoring.
- Supply and erection of traffic signs.
- Provision and installation of highway safety products.
- Supply and installation of road studs.
- Supply and fixing of ceramic markers.
- Manual and automatic traffic surveys.
- Fencing and road barriers.

Instrumentation Engineering

Synchronous to the Electrical Engineering, Instrumentation Engineering was established. Instrumentation engineering covers a wide array of maintenance, overhauling, testing, calibration and certification of all types of instruments, including safety, ESD, and control valves; PLC 's DCS I SCADA Systems. and Installation and pre-commissioning of turkey projects. A team of professional & highly skilled technicians, specializing in oil, gas and petrochemical plants, power and desalination plants, supports companies' operations.

Civil & Structural Engineering

Yemen Future for oil, Gas, Construction & Socials foundation service has been actively involved in civil.

Engineering and construction projects for industrial plants and commercial residential buildings. From the beginning, Civil and Structural Engineering performed well, reaping the benefits of a rapidly growing construction sector. Yemen Future for oil, Gas, Construction & Socials foundation service

has broadened the scope of work in the construction industry, branching off into specialist disciplines including infrastructure work, pre-cast and pre-stressed concrete structures, sub-stations, pumping and power stations and reservoirs; each independent in function, yet all forming the core of activities. Additional specialist activities include:

- Conventional and pre-engineered steel structures
- Carpentry and Joinery

Mechanical Engineering

By focusing on supporting the ever-increasing need for expert mechanical engineering services, Yemen Future for oil, Gas, Construction & Socials foundation service carries out EPIC.

projects in the areas of pipeline engineering, storage tank construction, plant assembly, scheduled and unscheduled maintenance and plant shutdown services.

Supported by its own comprehensive fabrication facilities, Yemen Future for oil, Gas, Construction & Socials foundation service.

Also undertake diverse mechanical engineering works. Backed up by a quality control and quality assurance inspection team Yemen Future for oil, Gas, Construction & Socials foundation service

ensures that all works complies with international standards and codes of practice.

Shutdown Maintenance

Our clients: The Major Oil companies in Yemen. Our Team consists of well experienced, highly qualified and dedicated work force and with highly sophisticated equipment's.

Nature of works: Major shut down jobs in Oil & gas plants, Petrochemical industries.

How we work: Do any kind of shutdown & overhaul works in very safe, efficient, well in advance & to entire satisfaction of our clients.

Yemen Future provides complete team for Plant Shutdown Services for Petrochemicals, Chemicals, Fertilizers, Oil & Gas industries, Power sector etc.

Plant Shutdown Team provides services for following Area:

- ❖ Mechanical Maintenance (Rotating and Stationery Equipment)
- ❖ Industrial Cleaning Services '
- ❖ Valve Maintenance Services
- ❖ PSV Removal and Reinstallation Services
- ❖ Insulation/ Refractory Repair Services
- ❖ Electrical Maintenance Services including Relay and Protection, Substation Maintenance, MCC, Transformer and Field Electrical Etc.
- ❖ Instrumentation Maintenance - Field Instrumentation, DCS, PLC, ESD etc.

Hydro-Jet Cleaning

Hydro industrial cleaning application; Yemen Future for oil, Gas, Construction & Socials foundation service-jet cleaning (Hydro blasting / high pressure washing) is the most common offers you expertise in both conventional and technologically advanced hydro blasting applications. Our customized systems use various media at varying pressures and flow rates to clean surfaces, process equipment, heat exchangers and other industrial vessels. We can apply hydro blasting to virtually every process configuration to efficiently remove foul ants and other built-up materials. Our team matches the right equipment, specialty systems, and personnel to your exact needs and specifications.

Chemical Cleaning

Yemen Future for oil, Gas, Construction & Socials foundation service offers a proactive approach to.

Chemical Cleaning. We have the most up to date chemical cleaning technologies to remove residual oils, corrosion products, water hardness deposits, and other foul ants from industrial process equipment. With our "flawless execution standards" we provide our clients with guaranteed results.

Valve Maintenance Facility

1. Flat Cast Iron Lapping Block.
2. Surface Plates.
3. Lapping Compounds.
4. Diamond Polish.
5. Test Rig with N2 Cylinders for tightening/testing of safety relief valves as per API527.
6. Hydro testing equipment as per AP1 598.
7. Dead Weight Tester.
8. Welding Equipment's.
9. Blasting & Spray Paint Equipment.
10. Machining Equipment.
11. Rubber Lining for Butterfly valves.
12. Compressors.
13. Pressure recorders.
14. Pressure Gauges.
15. PSV Test Benches (Venti).
16. Portable test Rig with regulator.
17. Digital pressure gauges (Druck).

Good Transportation:

Flatbed transport is one of the most common transports available for transporting things such as heavy materials and containers and transfer of commodities for factories.

Goods:

Stone blocks, Heavy Machinery, Steel re-bar transport, Raw Materials Transports, containers, and. etc.

Raw Materials:

Our fleet of Dump Trucks provides transport for all sorts of raw materials both on the road or within the sites.

Different Raw Materials:

Sand, Gravel, Small Stones, Crusher Plant Products.

Our Fleet of Bulker transport has recently expanded to significantly within the Yemen.

We Have Been awarded contracts from many companies to transport cement for major construction projects throughout the country.

Logistics Services:

Our Company specialized in worldwide Freight Forwarding, worldwide

- ❖ Air freight.
- ❖ Sea freight
- ❖ Transportation.
- ❖ International delivery door to door services.
- ❖ Customs clearance.
- ❖ Warehousing.
- ❖ Distribution.
- ❖ Packing & removals.
- ❖ Project cargo handling.
- ❖ Air charters.
- ❖ NDT Materials permit & clearance.

Car Rental Services:

Rent a car from our company and save with great *car rental* deals at our best rate, guaranteed., Modern

- ❖ Model Cars 2018.
- ❖ 4X4 Cars.
- ❖ Trucks, mini Vans.
- ❖ Buses.
- ❖ Lorries and Pickup.

Our Vehicles are fully equipped with First Aid tools, Fire extinguisher and covered with fully insurance.

CAMP CATERING & FOOD SERVICES:

Yemen Future knows that feeding a hungry workforce is a challenge facing operators in remote camp locations. It's also a key ingredient for keeping workers committed to your company. Yemen Future provides complete catering services customized to meet your tastes.

Our chefs use professionally tested recipes and only the finest ingredients. We cater to changing tastes and trends that will keep your workforce satisfied. In even the most remote locations and extreme climates, we will provide your workforce camp with a wide range of flavors for hearty, nutritious meals, 24 hours a day.

We provide:

- ❖ Full breakfast and dinner service.
- ❖ Six-week cycle menu.
- ❖ Rig box lunches.
- ❖ Food safety/HACCP program.
- ❖ Existing food supplier agreements.
- ❖ Swipe card system for dining room.

Special features:

- ❖ Bag lunch service for day and night crews.
- ❖ Ethnic and “heart smart” dishes available.
- ❖ 24-hour snacks and drinks.
- ❖ Sandwich bar with “made-to-order” options.
- ❖ Popular and healthy food choices.

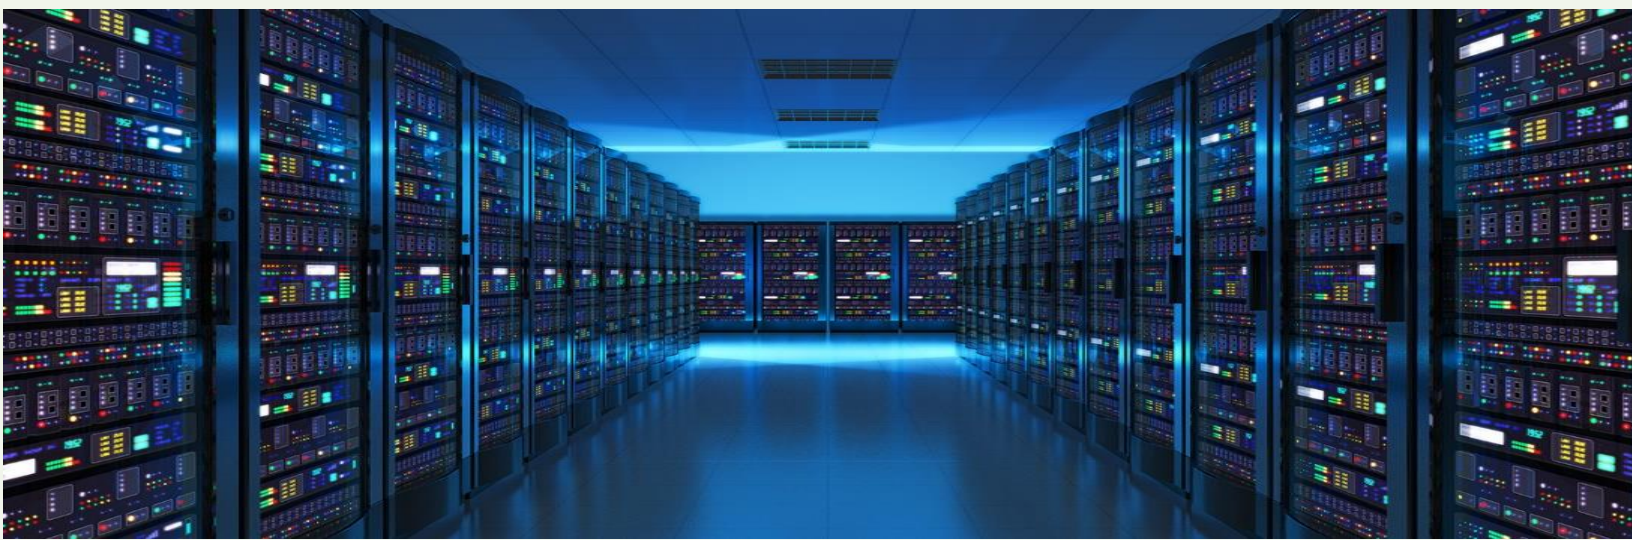

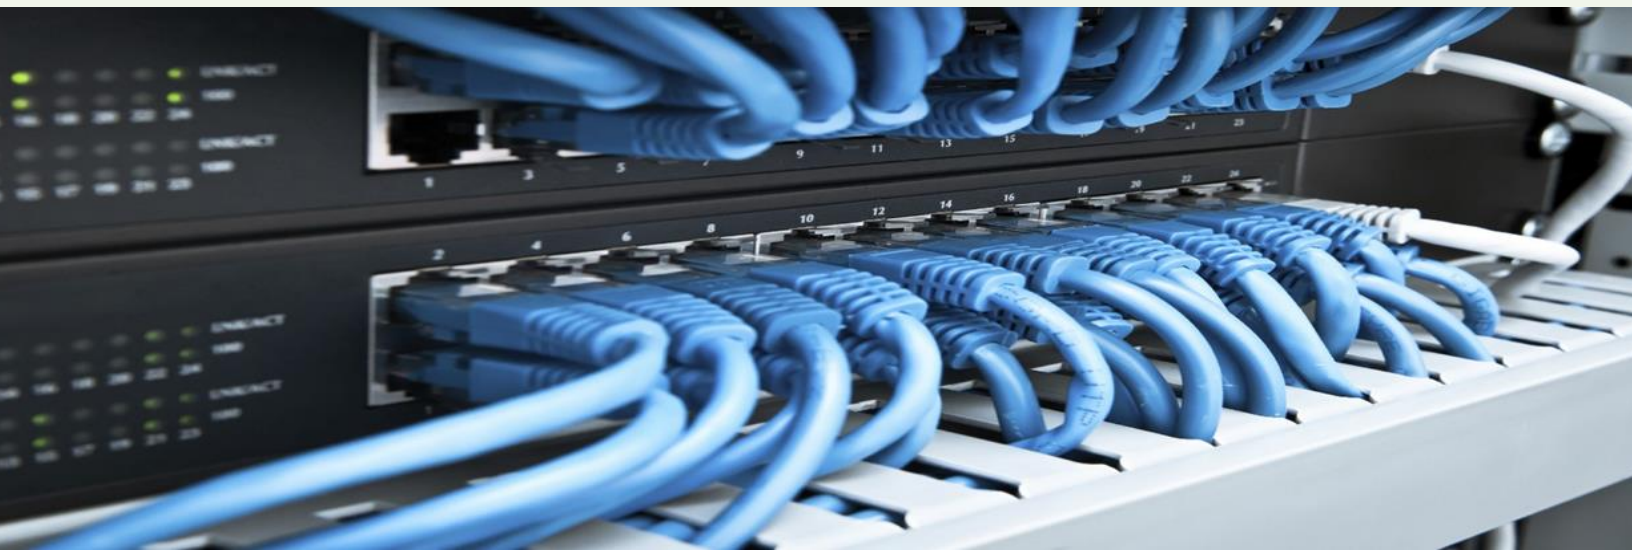

What we offer

From enhanced oil recovery projects in southern Yemen to gas well fracturing (facing) in Yemen, our commitment to reserve growth spans the globe. Continued development of natural gas and oil reservoirs is critical to meeting your company's business plan objectives — and Praxair's industrial gases and field services help you do just that. We have over 11 years of experience providing services in enhanced oil recovery, energized fluid facing, and well injection services. Additionally, as a leading supplier of nitrogen and carbon dioxide, Praxair is your one-stop partner for optimizing your oil and gas production.

Some of our clients:

- ❖ OMV YEMEN
- ❖ Calvalley Petroleum (Cyprus) Ltd
- ❖ Petro Masila
- ❖ SEPOC
- ❖ IOM
- ❖ Save the Children
- ❖ ICRC
- ❖ Deem for Development Organization
- ❖ YEMENOSCO.
- ❖ YEMEN PACIFIC.
- ❖ FIVE STAR LOGISTIC.
- ❖ YEMEN OPIC.
- ❖ AL-JASSAR IMPORT AND EXPORT TRADING.
- ❖ AL-RONI TRADING COOPERATION.
- ❖ SAMA TAHMA BUREAU.
- ❖ Al -JOBI FOR CONSTRUCTION.
